

Prepare this summer for a Great Fall Semester!

Welcome to the **College of Agricultural and Life Sciences** at the University of Wisconsin-Madison. Today marks the beginning of your preparation for a rewarding career. CALS students should complete the following checklist before they arrive on campus this fall.

- Obtain UW-Madison ID card
- Activate Net ID
- Record date and time of CALS New Student Orientation in your calendar
- Record date and time of required first-year advising session in your calendar (unless you registered for the CALS Freshman Seminar)
- Create your [BuckyNet](#) profile
- Use the [Campus map](#) to find the [Chemistry Learning Center](#) and [Mathlab](#)
- Explore a Student Organization on the [UW-Madison homepage](#) or the [CALS homepage](#) and search "Student Organizations"
- Explore a career field that interests you and three companies that conduct business in your field of interest (BuckyNet can help you with this!). Employers and professional schools (medical school and veterinary school) think highly of students who understand the companies and organizations in their field of interest. It is never too early to learn about your field.
- Identify two activities that you will pursue this fall that will advance your career goals or help you get into medical, veterinary, graduate school.
